

PMP® CERTIFICATION EXAM PREPARATION COURSE

19 – 23 MAY 2025

VENUE TBA (KLANG VALLEY)

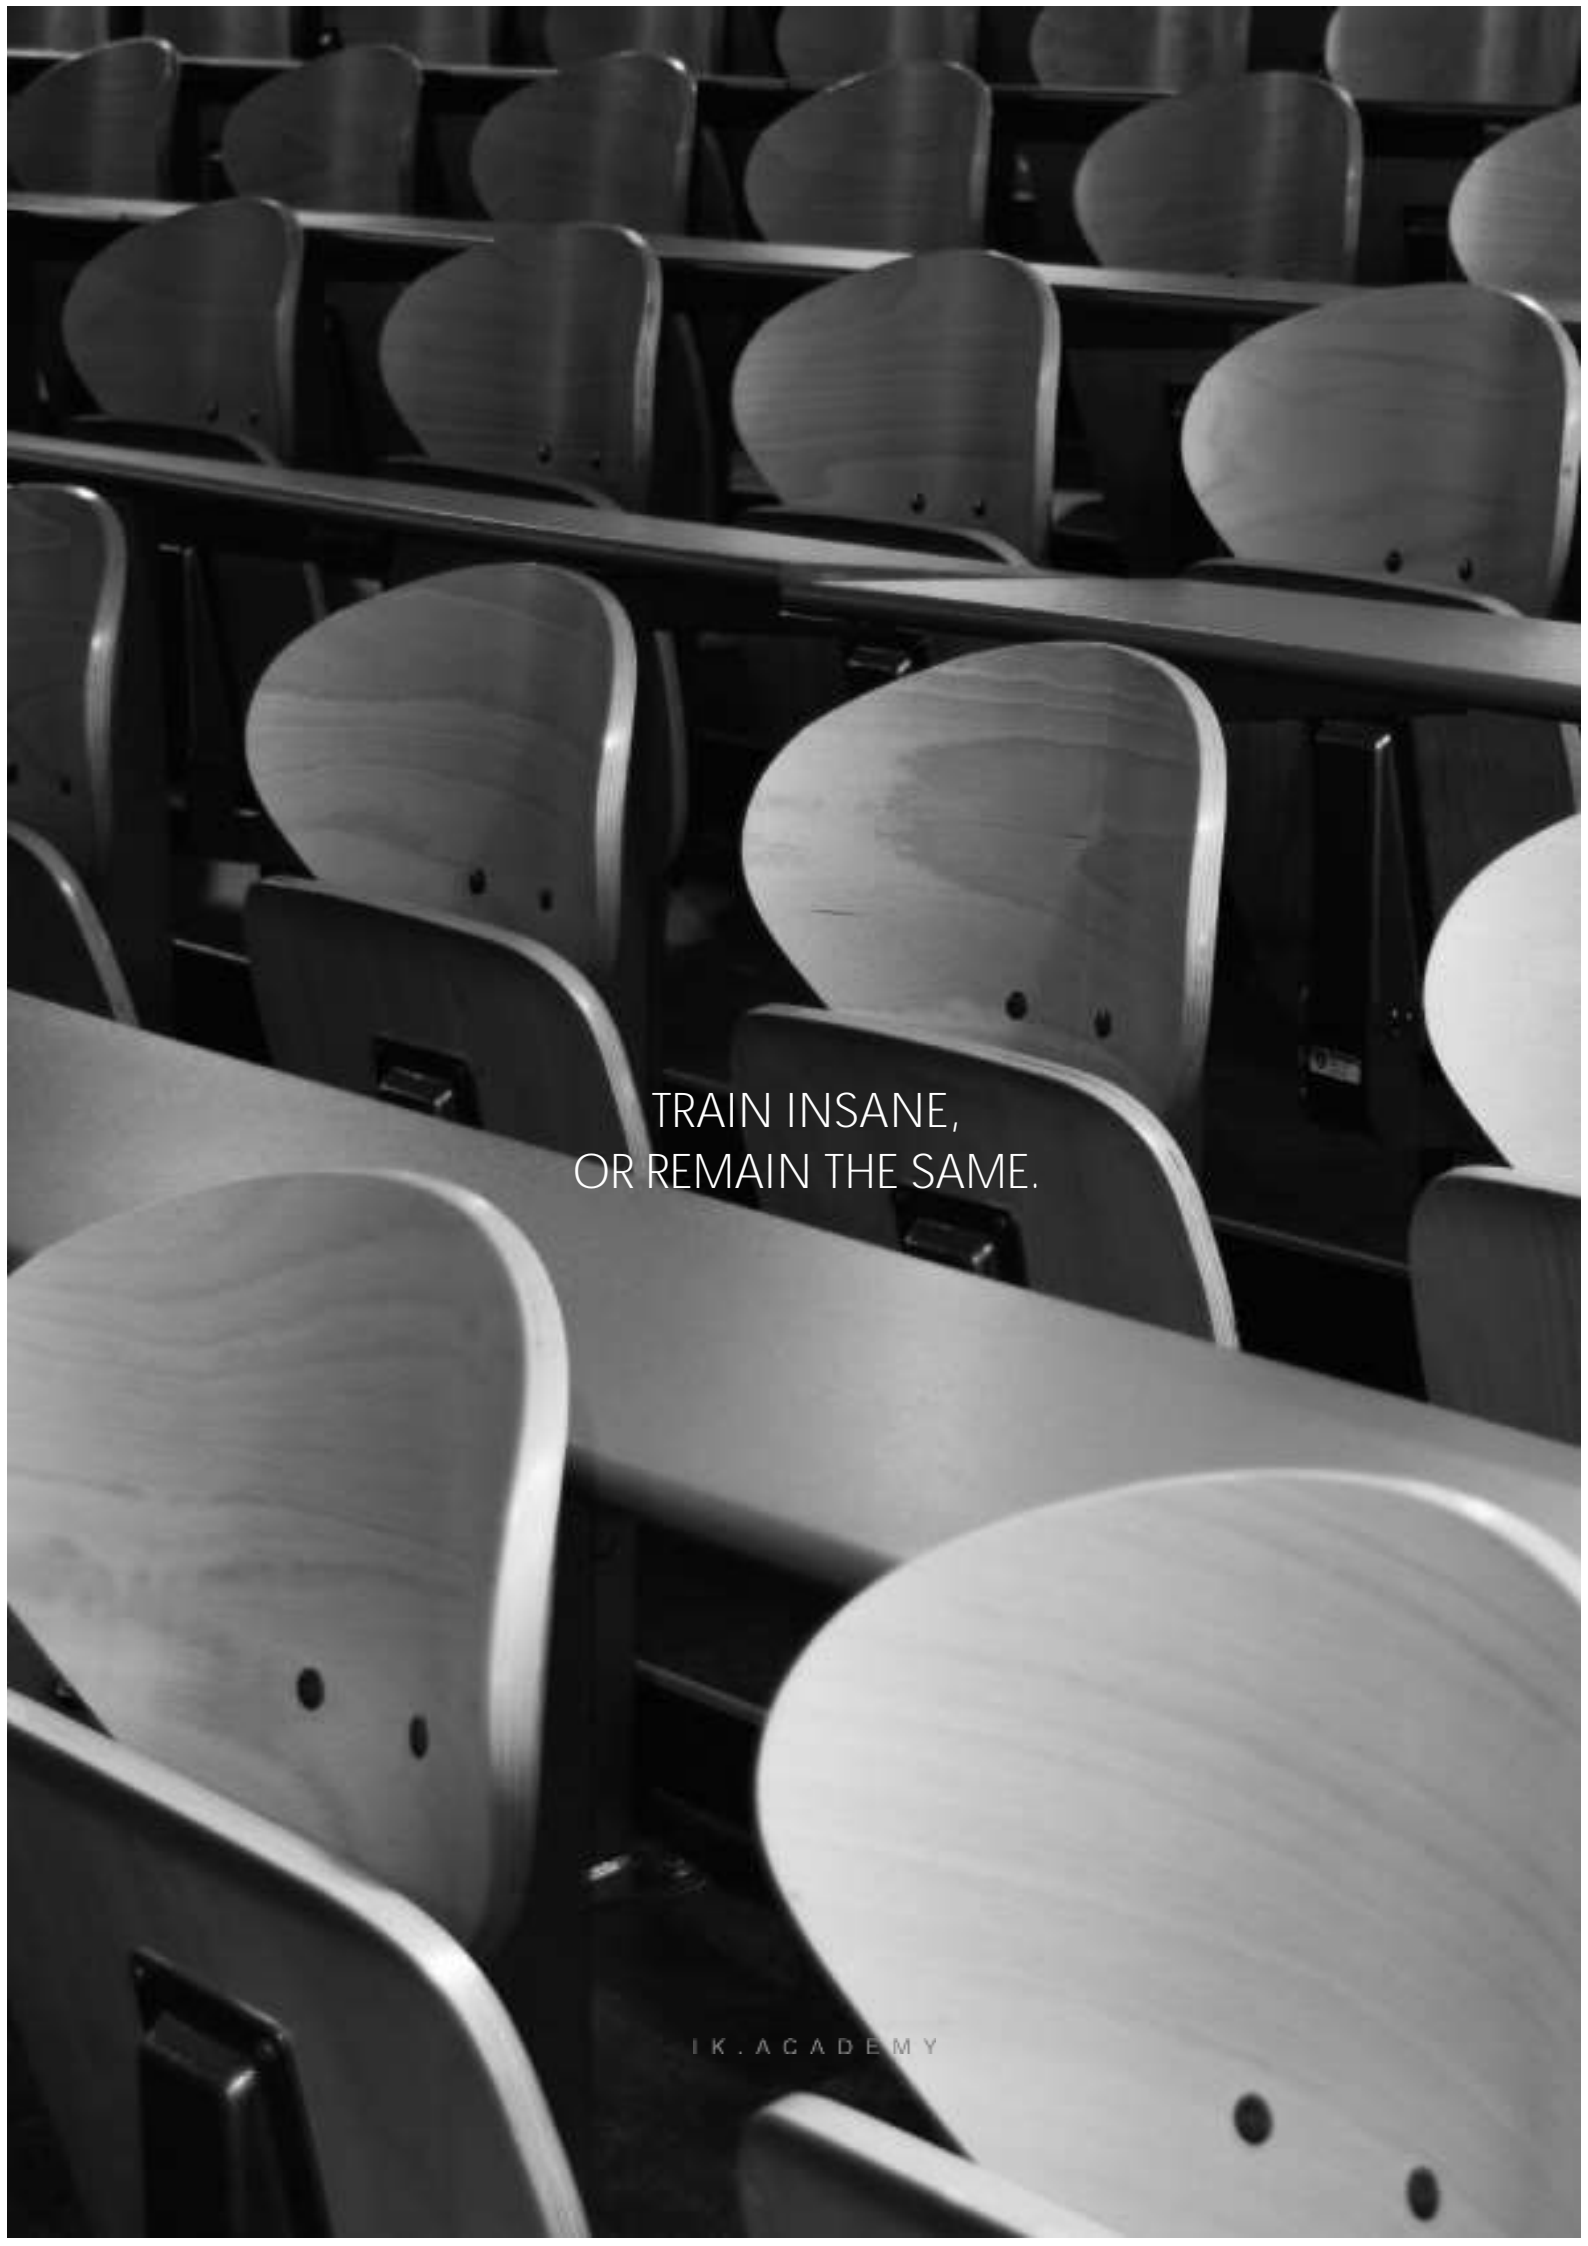

TRAINING PROGRAMME NO.: 10001294828

Our Consultant: Associate Professor Ir Ts Dr Jeffrey Yap Boon Hui

OVERVIEW

The ability to lead successful projects is fast becoming the standard to compete in today's highly complex and technical workplaces. This course is for skilled professionals with some experience in project management and working in teams. This course explores the standards and practices in agile, hybrid, and traditional project environments. It brings the knowledge of PMI's global community of practice to you, with coverage of the full suite of topics in the Project Management Professional (PMP)® certification. This course delivers the knowledge and skills that you need to demonstrate project management proficiency in professional settings. It can be a significant part of your preparation for the Project Management Professional (PMP)® Certification Exam. The skills and knowledge you gain in this course will help your team or organization avoid making costly mistakes and increase your competitive edge in the project management profession.

A black and white photograph of an empty classroom. The rows of wooden desks and chairs are arranged in a grid, receding into the distance. The lighting is soft, highlighting the texture of the wood. The overall mood is quiet and contemplative.

TRAIN INSANE,
OR REMAIN THE SAME.

WHAT IS PMP CERTIFICATION?

As the world's leading authority on project management, PMI created PMP Certification to recognize project managers who have proven they have the skills to successfully manage projects. Project Management Professional (PMP)® certification represents an elite group of project managers. It proves project leadership experience and expertise in any way of working.

To obtain PMP certification, a project manager must meet certain requirements and then pass a 180-question exam. The PMP exam was created by project leaders for project leaders, so each test question can be related to real-life project management experiences.

PMP certification validates that you are highly skilled in:

- People: Recognizing you have the skills to effectively lead and motivate a project team throughout a project.
- Process: Using predictive, agile and hybrid approaches to determine which way of working is best for each project.
- Business Environment: Highlighting the success of a project and its impact on overall strategic organizational goals.

AM I ELIGIBLE?

Earning your PMP Certification is a commitment, and that's why it is valuable. If you have real-world project management experience, you've finished the hardest part.

Before you apply, make sure you meet one of the following sets of PMP Certification requirements:

- | | |
|--|--|
| • Four-Year Degree | • High School Diploma or Associates Degree |
| • 36 months of experience leading projects within the past eight years | • 60 months of experience leading projects within the past eight years |
| • 35 hours of project management education/training or CAPM® certification | • 35 hours of project management education/training or CAPM® certification |

WHAT CAN A PMP® CREDENTIAL DO FOR YOU?

Globally recognized and demanded, the PMP® certification demonstrates to employers, clients, and colleagues that you possess the latest project management knowledge, experience, and skills to successfully lead projects, no matter what that project is. Whether you work in technology, business, or any other sector, project leaders are in demand to help businesses discover and gain value and keep work moving in a complex, changing world. The PMP® certification recognizes your ability to lead and direct projects successfully. Year after year, the PMP® certification commands global recognition and a higher salary for certified individuals compared with non-certified individuals.

WHO SHOULD ATTEND

This course is designed for individuals who have on-the-job project management experience, who are not certified professionals, and who might or might not have received formal project management training. The course enables candidates to develop professionally, increase their project management skills, apply a formalized and standards-based approach to project leadership, and seek career advancement by moving into a formal project manager job role, as well as to apply for the Project Management Professional (PMP)® certification.
